

Eco Tourism Resort

- **Novotel Ningaloo, Exmouth WA Australia**
- The Ningaloo Reef is as long as the Great Barrier Reef, is as beautiful and hosts the famous whale sharks.
- The government has decided to selectively open the area up to eco tourism and selected a Flovac vacuum system to cope with the increased tourism and sensitivity of the area.
- A single pump station was installed allowing for a variety of different developers to link to over a period of time. The Novotel Ningaloo were the first to be hooked up to the system.
